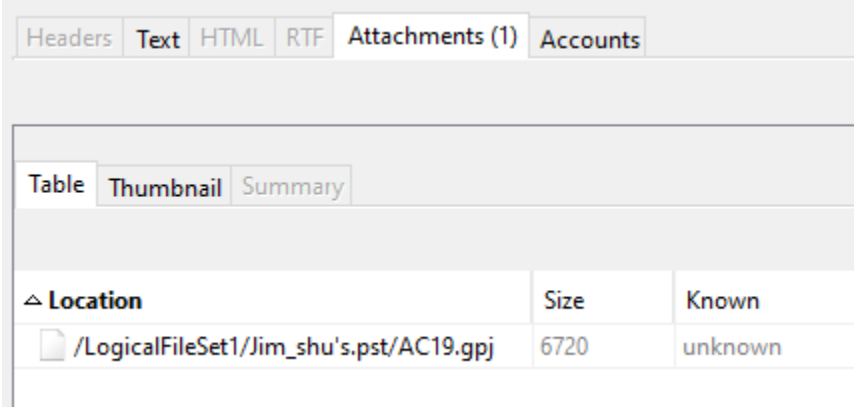
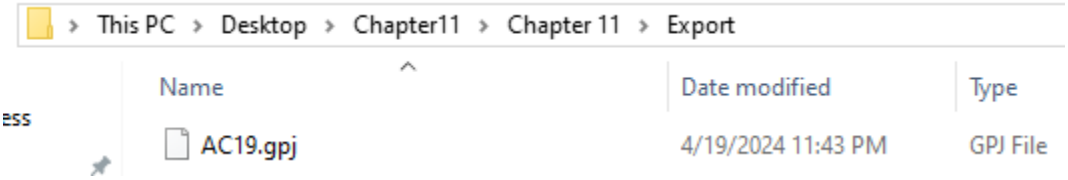
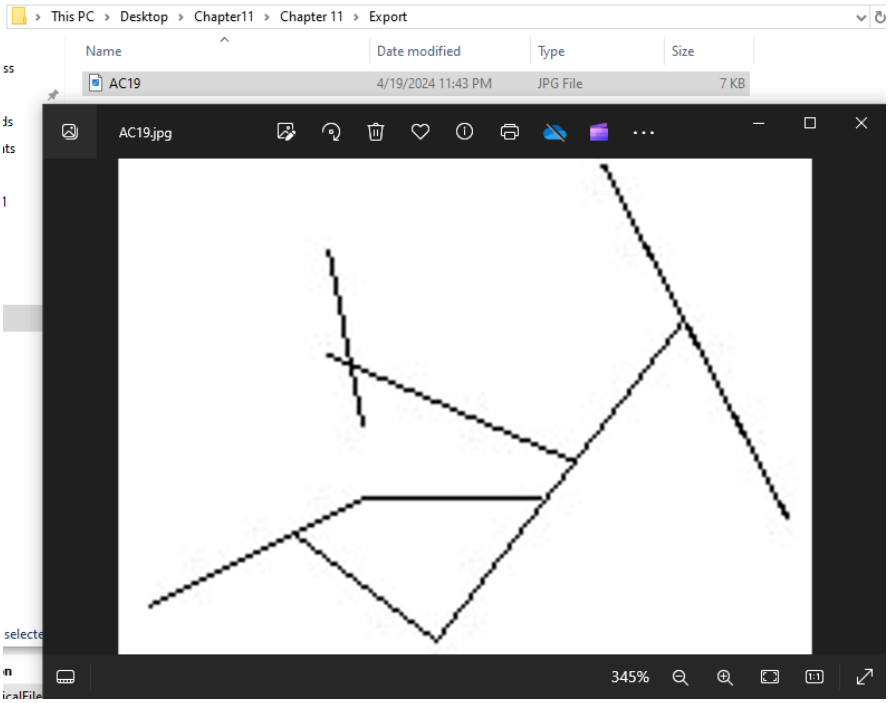
Opening the Default folder shows all the found emails. The top one is from Jim Shu to 5amspade@myway.com.



Selecting the Attachments tab for that email shows the attachment. It is in a “gpj” format.

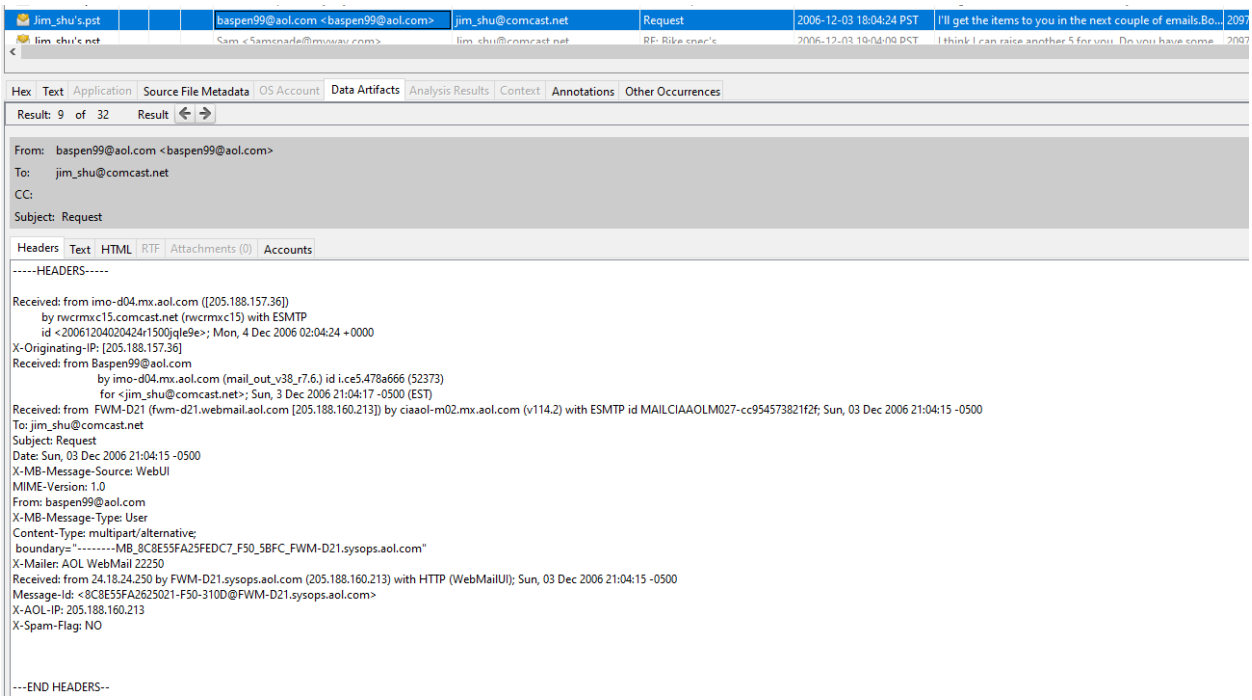


After extracting the file, we can change the type from “gpj” to “jpg” which will allow us to open the image.



This is the image. Art.

4.



Selected the email from baspen99@aol.com to jim and copied the contents from the Headers tab.

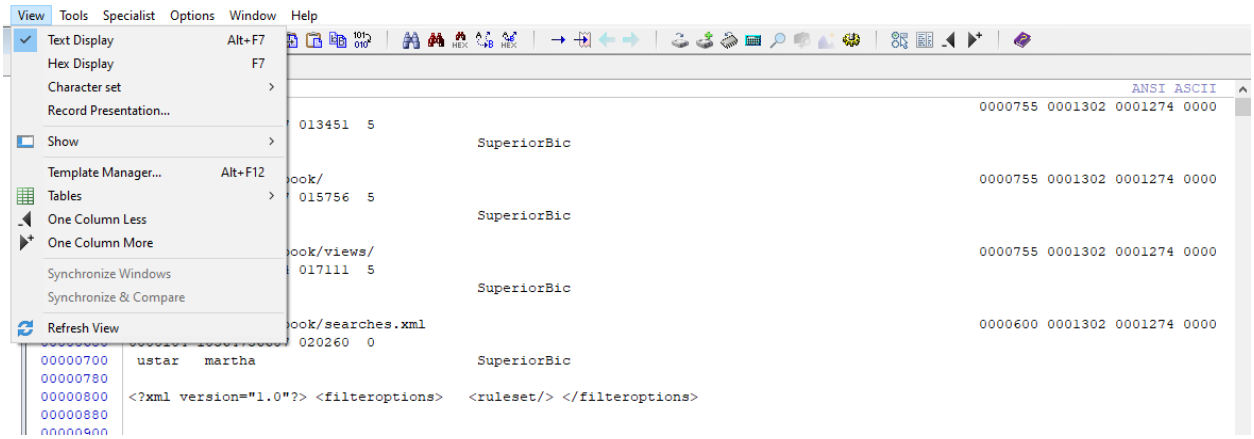
Pasting the headers into https://mxtoolbox.com/EmailHeaders.aspx and clicking analyze shows us a section extracting fields from the pasted text and nicely displaying it.

TASK 2

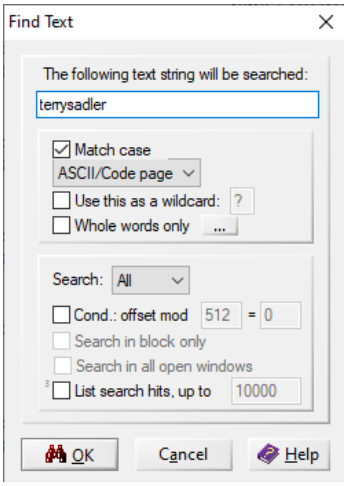
1. 
Opened WinHex.

2. 
Opened the martha-evolution.tar file in WinHex.

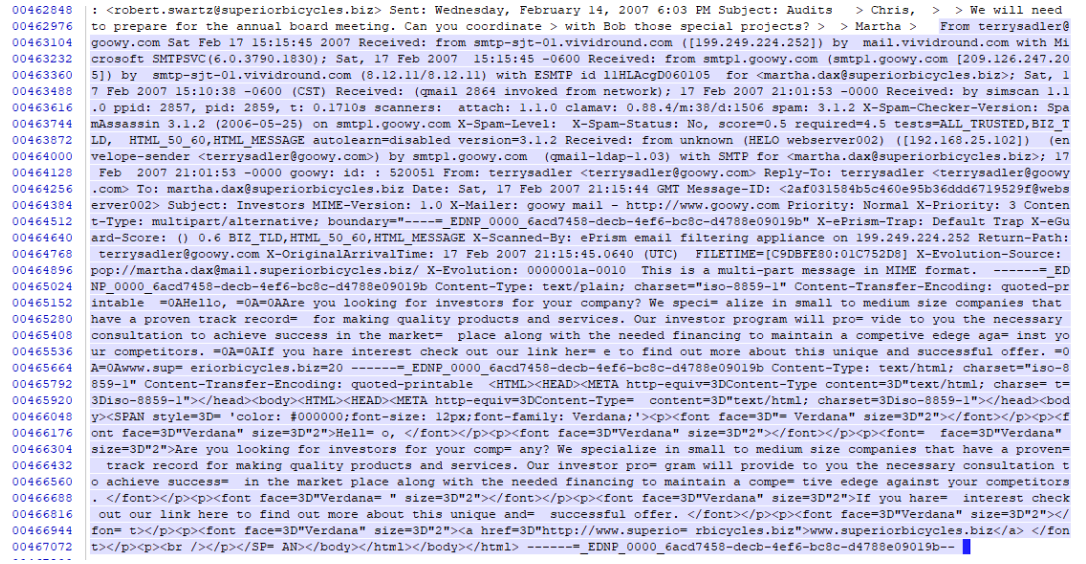


Removed the Hex view.

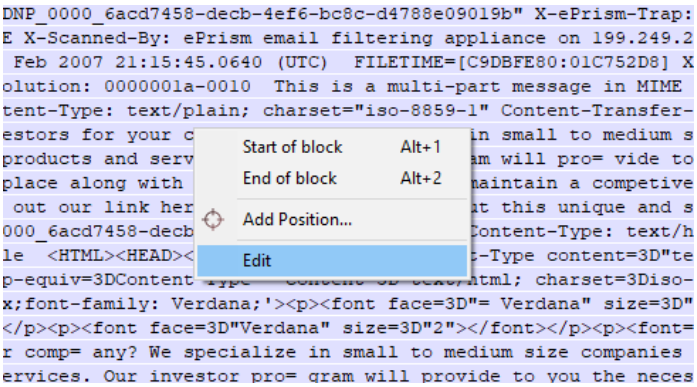
3.

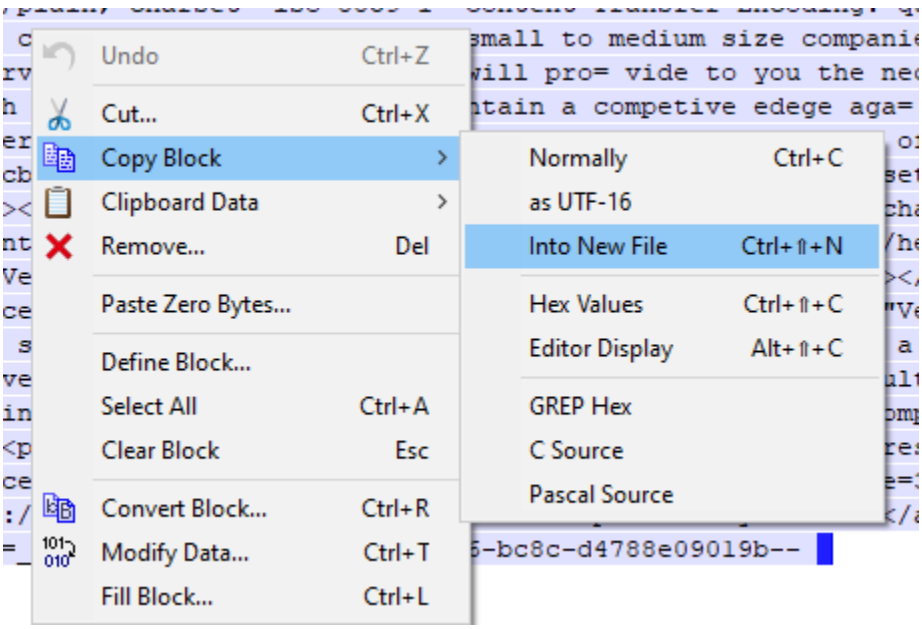


Launched the Find Text feature and searched for “terrysadler”

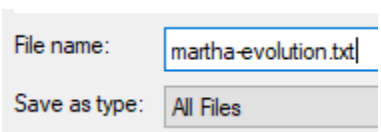


Highlighted all of the text from terrysadler.





Right clicked on the highlighted space, and clicked Edit, Copy Block -> Into New File.



Saved the file as martha-evolution.txt.

Jim,

Please coordinate with Ileen on your personnel needs since we haven't
hired a new HR manager. You;ll need to get the employee record retention
requirements for California, New York, and Washington, along with the
minimum wage for each of these three states.

Martha Dax, CEO
Superior Bicycles, LLC
```

Here is one of them, it is from Martha Dax to Jim Shu asking him to get the employee record retention requirements and the minimum wage for three different states.
